Maximum Marks	4 Marks

Solution Architecture

The AI Powered Video Script Generator is designed as a simple web-based application that connects the user interface with an AI language model through a secure backend. The architecture focuses on fast response, ease of use, and secure handling of API credentials.

- Collect user inputs such as product details, audience, tone and duration.
- Process requests using a Flask backend.
- Generate scripts through the Groq API using the LLaMA model.
- Return structured outputs including Hook, Script, Scene Suggestions and CTA.
