

CUSTOMER JOURNEY MAP

DATE	30 JUNE 2026
TEAM ID	KANAK DHINDHWAL , ISHA SAINI , BALJEET KAUR
PROJECT NAME	AI POWERED VIDEO SCRIPT GENERATOR
MAXIMUM MARKS	

The customer journey map helps us understand the complete experience of a user while trying to create video scripts and generate ideas. It shows the steps a user goes through, from realizing the need to using the final solution.

Our target users include content creators, students, and digital marketers who want to create engaging video content but struggle with idea generation and script writing.

Customer Journey Map Table

Stage	User Action	User Thoughts	User Feelings	Pain Points	Opportunity (Our Solution)
1. Awareness of Need	Realizes they need to create a video or content	“I need a good idea for my next video.”	Slight pressure, confusion	No clear direction on what topic to choose	Our tool can suggest creative video ideas instantly
2. Idea Search	Searches online, watches other videos for inspiration	“What topics are trending right now?”	Overwhelmed due to too many options	Time-consuming and unclear inspiration process	AI-based brainstorming feature for quick idea generation
3. Script Writing	Starts writing script manually or with basic tools	“How do I structure this properly?”	Frustration and writer’s block	Difficulty organizing thoughts into structured script	Automated structured script generation (intro, body, conclusion)
4. Editing & Improvement	Revises script multiple times	“Is this engaging enough for my audience?”	Doubt and uncertainty	Repetitive editing and lack of confidence	AI suggestions to improve tone and engagement
5. Final Output	Finalizes script and prepares video content	“Now I can start recording.”	Relief and satisfaction	Still feels the process is slow	Faster, ready-to-use scripts reduce overall effort

Summary

This journey map clearly shows that users face challenges mainly during idea generation and script structuring. Our AI-powered solution directly addresses these pain points by making the entire process faster, simpler, and more creative.
